News Release

Moneghetti Minerals to attend GSN Symposium in Nevada

Moneghetti Minerals Limited (Moneghetti, the Company) today announced that it will be attending the 2022 GSN Symposium in the Reno/Lake Tahoe region of Nevada from May 2-5, 2022.

The GSN Symposium, hosted by the Geological Society of Nevada, attracts an international audience from the minerals industry, government and various universities. The 2022 theme, 'Vision for Discovery', emphasises the goal of science to explore and make new discoveries in the Basin and Range Province.

Moneghetti's Managing Director and CEO, Ms Anna Nahajski-Staples, said this was an ideal opportunity to get to know the highly talented technical community in Nevada and build local relationships.

"Given this is a once in a five year event, we couldn't miss it," said Ms Nahajski-Staples.

"We're delighted to have the opportunity to get on the ground in Nevada, conduct site visits and most importantly spend some time with our growing management team and contractors," she said.

The conference runs from May 2-5 at the Nugget Casino Resort in Sparks, Nevada.

Mr Kyle Larson was recently appointed as Moneghetti's Exploration Manager, North America and will also be attending the conference.

Should you wish to meet with Moneghetti's management before or during the conference, please contact Investor Relations Manager, Ms Jessica Langer, through the contact details below.

About Moneghetti Minerals

Moneghetti Minerals is a purpose-driven, early stage gold exploration company focused on high-grade, scalable opportunities in Nevada and Western Australia. The Company is expected to list on the Australian Securities Exchange (ASX) and commence trading on the OTC Market in 2022.

Moneghetti has two gold projects in Nevada, which is the USA's largest and most prospective gold producing state. Around 50% of the prospective rocks are under cover and it remains underexplored. The flagship Ecrú project is prospective for multi-million-ounce Carlin-style mineralisation and the Dolly Varden project for pluton related gold veins.

The Company's third project, Bedonia East, is in Western Australia. Moneghetti will pick up where previous explorers halted and will drill below historical Rotary Air Blast (RAB) and auger drilling to target mineralisation associated with splay faults and a major shear NE of Norseman, along strike from Nova and Tropicana.
